Farmers!

August 5-7
2014

Resilient Agriculture: Adapting to Climate Change

Details at www.sustainablecorn.org

Next Generation Farmers! You are invited to attend an important conference that will be held August 5-7, 2014 in Ames Iowa. The Conference, titled “Resilient Agriculture: Adapting to a Changing Climate,” will provide an opportunity to meet and talk with other farmers, scientists, and industry leaders to learn more and discuss:

- Latest science on climate impacts on agriculture
- Adaptation strategies for corn/soybean-based systems
- Field day: demonstration plots with time to talk to scientists

Conference sponsors are offering Next Generation Farmers 10-12 scholarships, which will cover travel, meals, registration, and hotel for one night.

To apply for a scholarship, please submit an essay (~650 words) addressing the following question: “What challenges do you see as a future farmer in responding to climate change?” The essay is due by May 15, 2014. Please make sure your essay includes your contact information.

The scholarship committee will select 10-12 individuals from the essay submissions to attend the conference. If you are not chosen as a scholarship recipient, you are still welcome to join the conference at your own expense.

For more information on the Climate & Corn-based Cropping Systems CAP (CSCAP) project, please visit our website at sustainablecorn.org.

Farmer input is critical to our discussion and we look forward to your participation in this important event!

**Please submit your essays and/
or questions (via email)
