Farmers!

August 5-7
2014

Resilient Agriculture: Adapting to Climate Change

Details at www.sustainablecorn.org

Next Generation Farmers! You are invited to attend an important conference that will be held August 5-7, 2014 in Ames Iowa. The Conference, titled “Resilient Agriculture: Adapting to a Changing Climate,” will provide an opportunity to meet and talk with other farmers, scientists, and industry leaders to learn more and discuss:

- Latest science on climate impacts on agriculture
- Adaptation strategies for corn/soybean-based systems
- Field day: demonstration plots with time to talk to scientists

Conference sponsors are offering Next Generation Farmers 10-12 scholarships, which will cover travel, meals, registration, and hotel for one night.

To apply for a scholarship, please submit an essay (~650 words) addressing the following question: “What challenges do you see as a future farmer in responding to climate change?” The essay is due by May 15, 2014. Please make sure your essay includes your contact information.

The scholarship committee will select 10-12 individuals from the essay submissions to attend the conference. If you are not chosen as a scholarship recipient, you are still welcome to join the conference at your own expense.

For more information on the Climate & Corn-based Cropping Systems CAP project, please visit our website at sustainablecorn.org.

Farmer input is critical to our discussion and we look forward to your participation in this important event!

Apply for the scholarship and submit your essays online here:
<http://bit.ly/1gFHA17>.
Application deadline is May 15, 2014.
